

Social distancing is really important. We want everyone to keep safe if it is absolutely necessary to leave the house.

Please stay 2 metres apart... or...

0.002 kilometres

20 decimetres

200 centimetres

2000 millimetres

or...

Perhaps, for those of us of a certain age, we can remember to stay apart by

0.0012 miles

0.0099 furlongs

2.1871 yards

6.5614 feet

78.7469 inches

or...

If you prefer to remember your distances in real life units, then remember to stay apart by...

0.091 brontosaurus

0.2169 double decker buses

0.9967 osmans

14.2857 linguine

Or... 0.0313 Devon fatbergs

Can you come up with more ways of converting 2 metres? What units of measurement can you invent?

Now write a conversion formula from metres to your measurements. Submit your answers to **Mr Dunn** by Friday 17th April (the Friday after Easter)

There will be some form of prize, just not sure what as yet due to quarantine rules. The categories are:

- 1) The most original / obscure
- 2) The funniest
- 3) The largest number of original ideas
